

# WWF SWITZERLAND IS IMPROVING INTERNAL PROCESSES WITH ROBOTIC AUTOMATION IMPLEMENTATION BY CAPGEMINI

## Capgemini Invent and WWF Switzerland unite for a Robotic Process Automation Initiative!

We are thrilled to announce our recent pro-bono collaboration with WWF Switzerland, where Capgemini Invent stepped up to the challenge of transforming internal processes for a more efficient future!

### The Challenge

WWF Switzerland, a leading organization dedicated to preserving our planet's precious ecosystems, recognized the opportunity to optimize its internal processes and enhance operational efficiencies. To address this challenge, they sought the expertise of Capgemini Invent.

### Our Solution

The team at Capgemini Invent has committed to empower WWF Switzerland with automation solutions. For this purpose, we were on site at the WWF office and conducted an ideation session together with various representatives of departments to demonstrate the underlying potential of Robotic Process Automation (RPA).

Subsequently, we analyzed the structures of their internal processes and identified potential areas for optimization. We developed customized solutions for the HR and IT department that included two sub-processes in the onboarding procedure.

### The Implementation

Our experts designed and deployed a solution via RPA to automate repetitive tasks, streamlining workflows and use valuable human resources on more important assignments. This optimized operational processes and provided the employees with their first insights into creating automated workflows between their preferred applications. This integration fostered an accelerated and more digitalized work environment.

### The impact

The employees of WWF Switzerland have been introduced to RPA solutions to improve internal processes and workflows. By automating repetitive tasks, the organization can focus its energy on its daily operations and paved the way to consider additional RPA solutions.

We are looking forward to further ease an organization's daily processes in future collaborations so that they can focus on their core tasks while we automate their business landscape!

## About Capgemini

Capgemini is a global leader in partnering with companies to transform and manage their business by harnessing the power of technology. The Group is guided everyday by its purpose of unleashing human energy through technology for an inclusive and sustainable future. It is a responsible and diverse organization of nearly 350,000 team members in more than 50 countries. With its strong 55-year heritage and deep industry expertise, Capgemini is trusted by its clients to address the entire breadth of their business needs, from strategy and design to operations, fueled by the fast evolving and innovative world of cloud, data, AI, connectivity, software, digital engineering, and platforms. The Group reported in 2022 global revenues of €22 billion.
