

Optimising Nonprofit Capabilities: Transitioning from NPSP (Nonprofit Success Pack) to Nonprofit Cloud

In 2023, Salesforce enhanced its nonprofit solution portfolio with the introduction of Nonprofit Cloud. Discover how Capgemini can seamlessly support their customers to migrate from their existing Nonprofit Success Pack to Nonprofit Cloud.

Salesforce's evolution from the Nonprofit Success Pack (NPSP) to Nonprofit Cloud (NPC) marks a pivotal advancement in management technology, offering nonprofits an array of advanced features designed for the digital age. This transition not only supports more integrated, scalable operations but also offers advanced tools designed to meet the dynamic needs of the sector, combining enhanced analytics, improved financial oversight, and sophisticated donor management capabilities.

NPC's introduction is marked by a significant enhancement in data handling and user interaction. With features like sophisticated analytics and an improved financial subledger, NPC is the platform through which organisations can gain deeper insights into donor activities and manage funds with the greatest precision. The transition to Person Accounts enhances data integrity and provides a more flexible approach to managing constituent relationships, which is crucial for tailoring engagement and communication strategies effectively.

NPC facilitates donor segmentation, enabling nonprofits to understand their supporters better based on behaviours, donation types, and frequency. Thus, allowing for more targeted engagement strategies. Additionally, it simplifies the process of selecting key donors for new fundraising events or campaigns, streamlining organisational efforts. Automation features within NPC alleviate a sizeable portion of the organisation's workload, freeing up valuable time to focus on high-impact tasks. Furthermore, NPC's Volunteer Management capabilities enable seamless coordination of volunteers, allowing team members to sign up for activities and tender their time effortlessly.

Our experts, seasoned in not only the technical aspects but also in understanding the unique needs and challenges faced by nonprofits, can ensure a smooth transition to NPC, minimising operational disruption and aligning the new system with your organisation's strategic goals. We provide comprehensive support through tailored data migration strategies, system customisation, and integration with existing IT infrastructure.

Partnering with us for your NPC transition allows your organisation to benefit from our deep expertise in Salesforce implementations and our proven track record in transforming nonprofit operations through pioneering solutions. With our guidance, we can transition smoothly to NPC and elevate your organisation's efficiency and impact, while keeping you at the forefront of nonprofit technology.

About Capgemini

Capgemini is a global business and technology transformation partner, helping organizations to accelerate their dual transition to a digital and sustainable world, while creating tangible impact for enterprises and society. It is a responsible and diverse group of 340,000 team members in more than 50 countries.
