

A silhouette of a person walking on a beach at sunset. The person is walking from left to right, and their reflection is visible in the shallow water on the sand. The sky is a mix of orange, yellow, and blue, and the ocean is visible in the background. A blue line graphic starts from the bottom left, curves around the person's reflection, and ends near the top right.

Clear **Sight** IT Decision Maker

NAVIGATE THE FUTURE WITH CLARITY

CHANGING DATA INTO VALUE

ASK FOR A SUSTAINABLE,
MODERN IT ALIGNED TO
BUSINESS DEMAND.

ASK FOR A IT SPEND ALIGNED
TO BUSINESS VALUE
DELIVERED.

A strong catalyst for IT transformation

Data is at heart of making objective, fact based decisions that stand up to scrutiny. It enables you as IT or business leaders to sign off on transformative changes that affect your teams and operations while being cognizant of the costs, benefits and risks involved. It starts with having a clear understanding of the current IT assets you have, what state they are in, how they serve the business and the cost to serve. Mastering this data is the first step to moving ahead of the competition. Here is how you can envision the future with more clarity.

What is Clear Sight IT Decision Maker?

Clear Sight IT Decision Maker is an approach powered by a unique data visualization, analysis & decisioning platform. Coupled with our advisory and execution expertise, it brings the power of data and a structured approach to drive IT transformation decisions, empowering you to shape the future of your IT. By providing a holistic view of IT ecosystems and benchmark its performance across 13 sectors to identify opportunities for transformative improvements, we empower IT leaders like you to rise to the pressures of Transforming your IT to be more modern, sustainable and cost effective.

What sets Clear Sight IT Decision Maker apart?

Clear Sight IT Decision Maker reflects Capgemini's continued commitment to innovation over the past 12 years. You benefit from our wealth of experience from analysing hundreds of IT portfolios across a range of industries to deliver transformation outcomes. The approach is quick to show value across five key areas:

- **Acceleration** – bring data to life to reach the right decisions, fast (in as little as 8 weeks!)
- **Confidence** – data-led insights to act with assurance and objectivity, led by the business case.
- **Foresight** – a 360-degree view helps you understand the impact of decisions across different operational facets.
- **Effectiveness** – visualising data and decision logic aids in communication to business stakeholders and facilitating faster sign-offs on decisions & implementation
- **The future** – follow a fact-based, pragmatic route to achieving long-term strategic ambitions.

The true power of our approach

With Clear Sight IT Decision Maker, we offer you the clarity you need to navigate the challenges of delivering long-term value from digital transformation and enhancing the sustainability of your operations. Here are the tangible outcomes we can deliver:

Portfolio optimisation: identify technical debt and the risks present, evaluate applications to determine rationalisation opportunities (using the TIME model) as a way to realign spend to business value delivered, simplify the portfolio and strengthen portfolio governance.

Cloud assessment: evaluate applications and infrastructure for cloud migration, using the R-Factors framework to modernise the technology stack and deliver business agility. Further, determine migration complexity, build the wave plans and deliver individual reports to application owners for their sign off.

Target Operating Model: evaluate multiple dimensions to identify opportunities to reduce cost and improve the efficiency & agility of service delivery. This can cover applications, infrastructure and the operating model including sourcing, industrialisation and automation levers.

Sustainable IT: calculate and baseline the Scope 2 and Scope 3 CO2e emissions attributable to IT operations (compute, storage, network, employee devices, IT teams and print) & identify levers at an application level to reduce the overall IT carbon footprint.

In each case, we strive to deliver a remedial action plan or set of recommendations on the way forward and quantify the high-level cost and benefits – the business case.
