

IBM Maximo Optimising Asset Performance

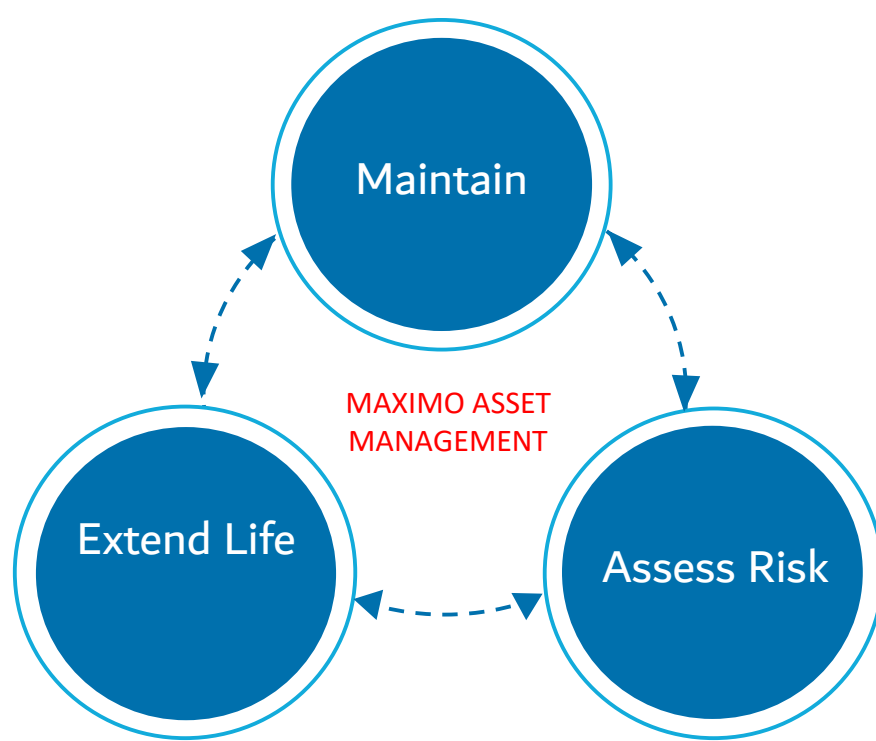

Capgemini

Within the utility industry, many of our clients face a similar set of challenges relating to their assets...

IBM Maximo helps you solve these issues through the Asset Performance Management (APM) Solution...

The goal is to **extend the life** of the asset

1. MANAGE

Increase the efficiency of managing your asset work, history, and maintenance to make them more effective.

15 to 20%

Increase in productivity

2. MONITOR

Observe your assets continuously, with real-time alerts when problems and maintenance arise.

24/7

Monitoring of your structures and assets

3. HEALTH

Assessments of the capabilities and lifecycle of your assets to ensure they maintain operating to a high standard.

30%

Reduction in time for risk assessments

4. PREDICT

Maximo Predict gives you the ability to foresee impending issues and act before they interrupt your business.

70%

Improvement in detection accuracy

15 – 30% overall cost reduction on maintenance realised by clients
