

A man with a grey beard and hair, wearing a dark blue suit, a light blue shirt, and a striped tie, is kneeling on a grassy area. He is holding a blue plastic trash bag in his left hand, which contains a US dollar bill. In his right hand, he holds a long-handled tool, possibly a grabber, which is positioned to pick up a dollar bill lying on the grass. The background shows a blurred green lawn and a building. A blue line graphic curves around the text on the left side of the image.

WASTE WEALTH MANAGER

More and more companies are looking to make their supply chains more sustainable.

The **Waste Wealth Manager** is responsible for identifying opportunities to reduce waste and increase circularity within the supply chain. They analyze the entire supply chain to determine where and how waste is being produced, and work with cross-functional teams to develop solutions that minimize waste and maximize resource efficiency.

As the demand for sustainable supply chains grows, this role will become increasingly important. Their expertise in waste management and circularity will help companies stay ahead of the curve, reducing their environmental impact and creating a more sustainable future for all.

RESPONSIBILITIES

- Organize a team to conduct an enterprise-wide audit of all resources and materials used
- Develop and implement strategies for managing waste resources, with a focus on waste reduction, reuse, and recycling
- Collaborate with internal teams, including operations, procurement, and sustainability, to ensure that waste management strategies are integrated with other business activities
- Manage relationships with waste service providers, including waste haulers, processors, and disposal facilities
- Conduct assessments of waste streams to identify opportunities for waste reduction and material recovery
- Develop and implement programs for waste reduction, reuse, and recycling, including employee engagement and training
- Track and report on the economic and environmental benefits of waste management activities, and make recommendations for improvements
- Stay up to date with the latest developments and trends in waste management and sustainability
- Provide leadership and support for sustainability initiatives and initiatives that create economic value from waste.

CANDIDATE REQUIREMENTS

- Bachelor's degree in environmental science, sustainability or a related field
- 3+ years of experience in waste management, sustainability, or environmental management
- Strong understanding of waste management practices and regulations
- Experience developing and implementing waste management programs
- Strong project management and organizational skills
- Excellent communication and interpersonal skills, with the ability to work effectively with cross-functional teams
- Creative and strategic thinking, with the ability to develop and implement innovative waste management strategies
- Passion for using waste resources to create economic value and support sustainable development.
