

CAPGEMINI PARTNERS WITH THE CYBERPEACE INSTITUTE TO BOLSTER CYBERSECURITY OF NGOS

Cybersecurity has rarely ever been higher on business agendas than it is today, but there is hardly any organization that is not susceptible to attack. For the non-governmental organizations (NGO) sector engaged in humanitarian work and serving over one billion people, the consequences of cyber-attacks can be devastating. Such attacks not only put their sensitive data and credibility at risk but can also have far reaching impact on the lives of the people they serve. Although NGOs account for the second-most-targeted sector after IT, many struggle to resource even the most basic cybersecurity controls..

In view of these challenges, Cappgemini has signed a memorandum of understanding (MoU) with the [CyberPeace Institute](#), a Geneva-based NGO focused on protecting civil society from cyber threats. Cappgemini will lend its cybersecurity expertise to support the NGOs aligned with the CyberPeace Institute's Builders program in enhancing their digital security posture and resilience.

Letting NGOs Concentrate
on Humanitarian work
as we stand guard
against Cyber Attacks

Together with CyberPeace Institute, Cappgemini is working to create a world where peace is possible both on the ground and in cyberspace. As part of Cappgemini's #Cyber4Good initiative, we seek to create a powerful cyber ecosystem based on the values of collaboration, entrepreneurship, and inclusion.

Our volunteers from diverse cybersecurity and crisis response backgrounds, will give their time to support over 100 NGOs as part of the **CyberPeace Builders** program. The four key focus areas are:

CONSULT	Help in investigating and analyzing cyberattacks against NGOs and humanitarian actors and share actionable threat intelligence with them.
PREVENT	Support cyber preparedness and resilience among NGOs through risk assessments, simulation exercises, and training.
ASSIST	Provide hands-on technical and forensic investigative support and assist NGOs with incident-crisis management.
STRENGTHEN	Develop standards, foster multistakeholder collaboration, and advocate for protection of the humanitarian sector.

“ We share in the CyberPeace Builders’ commitment to bridging the digital divide for non-profit organizations in need of cyber talent. Through our #Cyber4Good initiative, we believe that technology should provide opportunities for all, and I am confident that our cyber specialists will be able to make a real difference to civil society in the year ahead with increased digital security support.”

Nive Bhagat
Chief Executive, Cloud Infrastructure Services
