IT’S BUSINESS WITH IMAGINATION

ORACLE’S CLOUD TECHNOLOGY: OUR KNOW-HOW AND OUR CLIENTS’ VISION.

Every major business function, in every major sector: Oracle’s cloud technology covers all areas of the enterprise, enabling companies to lower their costs, improve their controls, increase their productivity, and make the most of every success.

Each particular business need, in each particular way: Capgemini’s experience helps to shape powerful Oracle platforms and applications to suit individual circumstances, creating winning cloud solutions.
THE CAPGEMINI ORACLE PARTENRSHIP GROWS STONGER EVERY YEAR

1995
25 years of long-standing partnership with Oracle

2011
Capgemini was one of the first companies to be named a Global Diamond Partner by Oracle

2016
The Cloud Partner Program was officially released on 1st Feb 2016. We were globally qualified for Cloud Premier status

2017
Oracle launched Cloud Excellence Implementer (CEI) program and we achieved the Oracle CEI accreditation.

2018
Achieved Platinum Partner Level, the highest level in the Oracle Partner Network

2020
Oracle dissolves partnership levels and introduces expertise tracks. Capgemini participates in the Hardware tracks in the modern Oracle PartnerNetwork.

2024 AND BEYOND
• ERP Cloud Advisory
• Intelligent Cloud Operations
• Intelligent Restaurant Operations
• Transformative HR
With global expertise in cloud services, software as a service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS), Capgemini puts proven innovations and methodologies to work to make your cloud journey the best it can be.

We make the most of the full suite of Capgemini’s Oracle Cloud Services:
- Oracle Cloud Capabilities
- Core PaaS/IaaS capabilities
- Cloud / IaaS / PaaS industry solutions

Our transformation approach rests on four key cloud solution pillars:
KEY STRATEGIC SOLUTION: ERP CLOUD ADVISORY

BUSINESS CHALLENGE

- Are our systems too complex for the cloud business?
- Do the functionalities we need exist in the Cloud?
- What should our migration strategy be?
- How much time will it take?
- How much will it cost?
- How will it impact my people?
- What would my ROI be?

CAPGEMINI SOLUTION

ERP Cloud Advisory is an easy-to-use framework devised by Capgemini to quickly provide customers a view of cloud services fitment for their organizations. It amalgamates Capgemini’s extensive expertise in Oracle Cloud solutions and a deep understanding of business process mapping. The framework works on a T-shirt sizing principle, enabled by a spreadsheet-based questionnaire that helps clients understand their Cloud migration journey in all aspects.

CUSTOMER BENEFITS

The tool uses an in-built maturity model that Capgemini has developed for each process area, and maps the customers inputs against product capabilities of the cloud. The outcome of the assessment is designed to achieve:

- Scalability to the client’s needs
- Focus on the future state
- Agility to market conditions
- Actionable cloud solutions roadmap
BUSINESS CHALLENGE

Many businesses have Oracle technology underpinning an enterprise IT estate of established and stable application suites. Such estates often include applications with traditional monolithic architectures which do not easily lend themselves to modernization. This adds complexity, cost and time to the transformation challenge of cloud technology adoption. This can lead to a divergence of approach, whereby enterprises exploit cloud for digitalization in discrete business domains where adoption is easier, but stall digitalization in systems of record and mission critical parts of the enterprise. This duality leaves digitalization partially achieved, and dilutes the commercial and business benefit offered by cloud adoption, with TCO reduction remaining an elusive goal.

CAPGEMINI SOLUTION

Capgemini’s ICON capabilities and OCI’s unique technical architecture unlock a raft of cloud use-cases, with proven architectures, tools, accelerators, patterns and code artefacts to harness the power of Oracle Cloud Infrastructure:

- **Capgemini 50/50 for Oracle ERP**: Helps to reduce deployment effort by 50% and a production-ready environment can be realized in just 50 days.
- **Oracle HPC**: Provision High-Performance Compute cluster of nodes for computation and visualization, either standalone or as a burstable extension to complement an on-premise HPC platform.
- **Database Consolidation**: Oracle database, modernization and consolidation, and migration of non-Oracle databases.
- **Workload Migration**: OCI is hyperscale cloud for x86 and ARM workloads, plus the Kubernetes containerization service, Oracle’s accelerators for Weblogic workload migration and Oracle Verrazzanno for Open Source multicloud container orchestration.
- **VMware to Cloud**: Run your own VMware in the cloud, instead of running your VMs in someone else’s VMware. You retain control of software versions, configuration, operation and root credentials, fully in the cloud or hybrid across the data center and cloud.

CUSTOMER BENEFITS

Extreme performance and availability, with public cloud agility and economy of scale:

- Reduce the cost and improve the performance of Oracle Applications Unlimited
- Exit the data center, modernize and transform your database estate
- Improved TCO and reduced leadtimes with a modern cloud-enabled IT Operating Model
- Workload containerization and modernization
KEY STRATEGIC SOLUTION: INTELLIGENT RESTAURANT OPERATIONS (IRO)

BUSINESS CHALLENGE

Adapting to consumers’ ever-changing preferences and ever-growing need for convenience has always been a driving force of innovation in the Restaurant industry. To stay ahead in this fiercely competitive market, Growth-oriented Restaurant operators need to streamline their “Front of the house”, “Back of the House” and “Back-Office” & Support processes; all the while delighting guests by providing them with memorable experiences to turn them into repeat customers.

CAPGEMINI SOLUTION

CAPGEMINI’S IRO SOLUTION, with Oracle Fusion Cloud at its core, offers a comprehensive & integrated platform that empowers Restaurant operators to drive innovation across all aspects of their enterprise – Financials, People & Operations. Capgemini’s solution offers a digital core for Quick Service and Casual Dining Restaurant Operators; a digital core that is simple yet comprehensive and that will evolve with the growing needs of Restaurant Operators. The architecture is scalable, automated, & connected enabling Restaurant enterprises to transform into what we call ‘the Renewable Enterprise’, an enterprise able to constantly grow and adapt.

CUSTOMER BENEFITS

Enhanced Financial Accuracy and Reporting:
The integration of POS to receivables eliminates manual errors, ensuring accurate revenue recognition and financial reporting. With a streamlined revenue cycle, and the ability to generate real-time financial statements, clients can make informed business decisions based on reliable data.

Improved Operational Efficiency:
By automating revenue calculations and simplifying financial management, administrative burden on staff is reduced, freeing up time to focus on strategic activities, such as optimizing menu offerings, enhancing customer experiences, and expanding our brand portfolio. Operational efficiency gains result in cost savings and increased productivity.

Franchise Partner Collaboration and Satisfaction:
The integration with Franchise Partners’ systems facilitates real-time data on revenue sharing & royalty payments, and automates payment collection. This transparency fosters trust, leading to increased franchisee satisfaction and loyalty.

Scalability and Futureproofing:
Clients can easily adapt to incorporate brand and outlet expansions. Oracle’s continuous features & functionalities enhancements are instantly updated on the Cloud platform, leading to a futureproof solution.
KEY STRATEGIC SOLUTION: TRANSFORMATIVE HR

BUSINESS CHALLENGE
- Outdated systems creating complexity
- Inability to attract and retain top talent
- Inability to ascertain skill gap
- Inability to plan and manage skill demand and deployment
- Lack of digital self-service and empowerment
- Complex benefits management with aggregators
- Non-standard view of HR KPI across personas
- Dependence on the best-of-breed solutions for each function

CAPGEMINI SOLUTION
Transformative HR is a transformation (with Capgemini Invent) framework to deliver a future-fit HR function supporting fluid and augmented workforces of the future. Delivering a personalized employee experience underpinned by Oracle Cloud IP:
- Capgemini IP added to our advisory services
- Fast track: Oracle Cloud HCM – Script based Rapid Implementation
- Solutions: Digital Solutions powered by PaaS
- Testing Automation for on-going quarterly updates powered by Capgemini Cafe Test Automation
- Configuration workbooks, process maps, prebuilt integrations, prebuilt data migration tool kit

CUSTOMER BENEFITS
- Personalized HR services for employees in an engaging, intelligent, and secured way
- The HR function becomes a strategic business enabler
- Win the war for talent in a competitive global workplace
- Optimized workforce aligning roles to business goals
- Reduced manual effort and smooth customer journey by improved visibility

THE POWER OF COLLABORATION
